BELTOR MINE EXTRACTION DEVICE

Murray Engineering now offers complete machine retrieval packages using our 210t Beltor Mine Extraction Device.

At short notice, Murray Engineering's Retrieval team can mobilise and be on-site to have the best chance of retrieval.

Successful retrievals where all else has failed include Prominent Hill, Tanami, Jundee and Telfer.

Murray Engineering follows a strict maintenance regime of the Beltor which includes ACFM crack detection, pin and sling replacement with each retrieval and comprehensive checks of the machine before and after use.

For further information regarding our Machine Recovery Service, please contact our Business Development team today on 1800 MURRAY or email your interest to sales@murrayengineering.com.au.
